

SUPERV

INTRODUCING THE WORLD'S
MOST EFFICIENT WHOLE-HOME
AIR PURIFICATION SYSTEM.

The SuperV whole-home air purification system uses our proprietary DFS technology to circulate fresh, contaminant-free air throughout your entire home. The industry-leading SuperV provides greater than MERV 16 filtration efficiency with the pressure drop of typical MERV 8 filter. It is installed outside of the air handler or blower, resulting in low pressure drop, and less energy use when compared to mechanical filters. This unit can be installed in both residential and commercial locations.

HealthWay SuperV

Whole-Home Air Purifier with DFS Technology

 Disinfecting Filtration System (DFS) is our proprietary electronically enhanced filtration technology.

Ideal for asthma and allergy sufferers, households with small children or the elderly or anyone with a challenged immune system. Perfect for reducing the impact of wildfire smoke and airborne infections.

Features

- Filtration unit CFM capacity: 1,000, 2,000, 3,000
- Greater than MERV 16 efficiency
- Sealed to ensure no filter bypass
- Proprietary DFS technology
- High level capture of airborne mold, virus, and bacteria
- High-capacity filter with up to 3 years of service
- Operating power consumption is less than 9 watts, regardless of model
- Electrical requirements - 120V.
